eFinance for financial and digital investments announced the activation of their partnership with the universal health insurance authority which witnessed the commissioning of phase one services including the operation and management of the Universal Health Insurance System.

Through the partnership, "e-finance" for digital operations, a subsidiary of e-finance for financial and digital investments - in cooperation with "e-health" - the sister company for the group - will provide technical and operational support services to the system users from hospitals, healthcare centers, health units and authorities affiliated with the universal health insurance authority; in addition to managing and configuring the system components, infrastructure monitoring services, management and operation services and system monitoring services.

The first phase of the agreement will include citizens benefiting from the system in 5 governorates (Port Said - Luxor - Ismailia - Suez - South Sinai) through approximately 140 hospitals, healthcare centers and medical units, employing approximately 14,000 specialists, expected to reach more than 20 thousand specialists by the end of 2022.

On this occasion, Hossam Sadek, The Executive Director of the Universal Health Insurance Authority, stressed that this step paves the way for the successful launch of the Universal health insurance system in the governorates of the first phase, after ensuring proper preparation took place and in partnership with highly professional entities to implement it with the highest level of efficiency and in a manner that provides an excellent health service worthy of the Egyptian citizen.

He continued, "Using the experience and infrastructure of e-finance and e-health's specialization in management and operation, guarantees a smooth and accurate implementation of the system to the benefit of the citizens and medical staff alike.

While Hossam El-Goly, CEO of eFinance for digital operations, expressed his pride in the partnership with the Universal Health Insurance Authority, in a project that will change the concept of healthcare in Egypt, stressing his keenness to establish new partnerships to provide the latest technology solutions related to the sector at a global level, while enhancing the company's role as Egypt's leading company for operating and managing digital transformation projects.

Adding to the above, Hassan Al-Sukari, Managing Director of eHealth, said that the management and operation of the Universal health insurance system is a cornerstone for company's strategy and objectives, aiming to drive its position in the market as an open platform for all institutions and companies wishing to provide digital solutions that serve the healthcare sector.
